EDUCATION

Florida Atlantic University Boca Raton, FL

B.S. in Computer Science. GPA: 3.4. *Expected June 2027*

Relevant Coursework: Programming 1, Programming 2, Data Structures & Algorithms, Computer Operating Systems, Theory of Computation, Intro to Database Structures

PROJECTS

Personal IT & Cybersecurity Homelab

Raspberry Pi 5, Ubuntu, VirtualBox, Nmap, SSH, Networking

- Built and maintained a hands-on IT lab using a Raspberry Pi 5, Ubuntu, and VirtualBox to practice Linux administration, networking, and system troubleshooting.
- Configured and troubleshot Linux networking, DNS, SSH, and network services while documenting configurations and findings.
- Used Nmap to identify open ports and running services; expanding the environment with Docker, Wireshark, Windows Server/Active Directory, and security monitoring.

Cowrie + Wazuh Security Monitoring Lab

Linux, SSH, Cowrie, Wazuh, Nmap, Networking

- Built an isolated SSH honeypot with Cowrie to study authentication activity, network connections, and security event logging.
- Integrated Wazuh to collect, analyze, and surface security events as alerts for investigation.
- Generated controlled activity in the lab and documented findings to build hands-on experience with threat detection and security monitoring.

AI Chess Game

Python, Pygame

- Built a playable chess game in Python with human-vs-AI and AI-vs-AI modes using Pygame.
- Implemented Minimax with alpha-beta pruning, enabling the AI to evaluate moves several turns ahead.
- Separated the chess engine, AI logic, and game interface into distinct modules to improve maintainability.

EXPERIENCE

Shift Lead 2024 – Present

Planet Fitness *Fort Lauderdale, FL*

- Troubleshoot front-desk hardware and scanning equipment, manage POS and membership systems, and use Excel to track membership and facility activity for management.
- Lead front-desk operations during shifts for 100+ daily members, coordinating staff, assigning tasks, and maintaining smooth daily operations.
- Train and support front-desk staff, handle member concerns, and resolve issues independently without manager involvement.

SKILLS

Infrastructure: Linux, Networking, SSH, Raspberry Pi, Windows, Docker, Grafana, Uptime Kuma, LoRa

Frameworks & Tools: Nmap, Wireshark, VirtualBox, Docker, Git, MySQL, Flask, React, HTML/CSS, Pygame, OpenCV

Languages: Python, Java, C, C++

Certifications: CompTIA Security+ SY0-701 (In Progress), Autodesk Certified User: AutoCAD, MTA: Introduction to Programming Using HTML & CSS
